Documents are simple to COPY.

Would a producer send vital docs w/o having backups?  
Some might be just that dumb.

Replying to @MZHemingway

Tucker says that Biden documents that were mailed to him in LA by his NY producer vanished en route -- a major shipper was used and they have been unable to determine who opened the package and stole the Biden documents.

Bobulinski says that he learned from Senate report that he was lied to and stolen from by the Biden family. The Senate report revealed that Chinese sent money to a Biden firm and then straight to Hunter Biden -- circumventing Bobulinski's work on behalf of Sinohawk.

....per email from a Chinese official [July 26, 2017],  
the CHINESE proposed a \$5 M interest-free loan to the Biden family,  
But that \$\$\$ never made it to the business.  
The Senate report suggests it went to Hunter directly.  
From there, no one knows.

ROB WALKER: I just think that if somebody comes out now & verifies the [Biden] story, it blows up big time.

JAMES GILLIAR: We've got this situation now where it's escalating because somebody — allegedly one of us three — has QUALIFIED the story.
